thechildbrain
FOUNDATION

We strive to advance the knowledge and treatment of pediatric neurological diseases through research. The cornerstone of the Child Brain Foundation is the provision of funding and support of just-in-time concepts and research projects that will result in scientific and medical paradigm changes and better treatment for an understudied and underserved sector of the world's population: our infants and children, who are the hope for the future.

The Child Brain Foundation is a 501 (c) 3 public charitable foundation.
