We strive to advance the knowledge and treatment of pediatric neurological diseases through research. The cornerstone of the Child Brain Foundation is the provision of funding and support of just-in-time concepts and research projects that will result in scientific and medical paradigm changes and better treatment for an understudied and underserved sector of the world's population: our infants and children, who are the hope for the future.

The Child Brain Foundation is a 501 (c) 3 public charitable foundation.
